COURSE DESCRIPTION

This course (i.e. POM) is an introduction to the concepts, principles, problems, and practices of production and operations management. Emphasis is on managerial processes for effective operations in both goods-producing and service-rendering organization. POM is intended to provide the students greater understanding of the problems and analysis related to the design, planning, control and improvement of manufacturing and service operations. We develop managerial insights and techniques for controlling production processes, planning, organizing, product design, quality management, capacity planning, supply chain management and operations strategy through quantitative techniques. We illustrate these concepts by combining theory, examples and practical applications.

COURSE MATERIALS

- **Textbook(s):**

- **Course Web Site:**
The Canvas site for this course will contain lecture notes, reading materials, assignments, and late breaking news. It is accessible via: https://canvas.rutgers.edu/. You should check it frequently to remain updated. You are responsible for keeping aware of the announcements on the course web site.

- **Software:**
This course uses Excel Solver Add-in to solve (Non-)Linear Programming models. You may install and use QM for the corresponding examples.

LEARNING GOALS AND OBJECTIVES

The goal of this course is to enable you to develop mathematical models for solving the decision problems faced by managers in various business domains. We shall discuss basic classes of most useful business models which can be drawn from manufacturing, transportation and distribution, marketing and finance. The following topics will be covered during the course: linear programming formulation and solution methodologies, transportation and assignment problems, network management, project management, integer programming, decision analysis, forecasting, simulation, etc.

This course aims to improve students understanding of above-mentioned concepts, principles, problems, and practices of operations management. After completing this course, students should be able to develop analytical tools to deal with such decision problems in POM.
PREREQUISITES

Management Information Systems (29:623:220); Statistical Methods (21:220:231) or equivalent (e.g. Business Research Methods (29:623:340)).
Also, some basic skills of Excel Spreadsheet are required.

ACADEMIC INTEGRITY

_I do NOT tolerate cheating._ Students are responsible for understanding the RU Academic Integrity Policy ([http://academicintegrity.rutgers.edu/](http://academicintegrity.rutgers.edu/))

I will strongly enforce this Policy and pursue _all_ violations. On all examinations and assignments, students must sign the RU Honor Pledge, which states, “On my honor, I have neither received nor given any unauthorized assistance on this examination or assignment.” I will screen all written assignments through _SafeAssign_ or _Turnitin_, plagiarism detection services that compare the work against a large database of past work. Don’t let cheating destroy your hard-earned opportunity to learn. See _business.rutgers.edu/ai_ for more details.

ATTENDANCE AND PREPARATION POLICY

- Expect me to attend all class sessions. I expect the same of you. If I am to be absent, my department chair or I will send you notice via email and Canvas as far in advance as possible. If you are to be absent, report your absence in advance at [https://sims.rutgers.edu/ssra/](https://sims.rutgers.edu/ssra/). If your absence is due to religious observance, a Rutgers-approved activity, _illness_, or family emergency/death and you seek makeup work, also send me an email with full details and supporting documentation within two days of your first absence.
- For weather emergencies, consult the campus home page. If the campus is open, class will be held.
- Expect me to arrive on time for each class session. I expect the same of you.
- Expect me to remain for the entirety of each class session. I expect the same of you.
- Expect me to prepare properly for each class session. I expect the same of you. Complete all background reading and assignments. You cannot learn if you are not prepared.
- Expect me to participate fully in each class session. I expect the same of you. Stay focused and involved. You cannot learn if you are not paying attention.
- Look for _Announcements on Canvas_

NOTE

- The best way to contact me is via email.
- Instructor reserves the right to change/modify this syllabus as deemed necessary.
- Students are responsible for keeping themselves informed about any announcements, syllabus adjustments or policy changes made during scheduled classes.
CLASS POLICY

Class materials for each class will be posted on Canvas before class day. Students are permitted to use computers during class for note-taking and other class-related work only. Those using computers during class for work not related to that class must leave the classroom for the remainder of the class period. Generally, cell phones or any other course-unrelated electronic devices are prohibited from class meeting.

EXAMS, ASSIGNMENTS AND POLICIES

There will be two exams, i.e. one midterm and one final exam (please refer to course scheduling at the end of this syllabus). **No make-up exams will be given.**

Assignments (homework) are due at the beginning of the class period on the day they are due and have to be submitted (electronically) on Canvas. **No assignment will be accepted after due dates or late including the reasons of absence.**

During exams, the following rules apply:
- If you have a disability that influences testing procedures, provide me an official letter from the Office of Disability Services at the start of the semester.
- No cell phones or other electronics are allowed in the testing room.
- You must show a valid Rutgers photo ID to enter the room and to turn in the exam.
- Alternate seating; do not sit next to another student or in your usual seat.
- Use the bathroom prior to the exam start; bathroom breaks, if essential, will be escorted.

GRADING POLICY

Exam I (Midterm): 30%
Exam II (Final): 30%
Homework: 30% (2 assignments, 15% each)
Attendance & Participation: 10%

At the end of course, homework, attendance and test scores with the weights specified in the syllabus will be combined to get an overall score from 0-100. I then rank these scores, and choose sensible cutoffs between A, B+, B, C+, C, D and F. The final letter grade will be assigned as follows.

**-Grading standard:**
A 90-100
B Plus 86-89
B 80-85
C Plus 76-79
C 70-75
D 60-69
F 59 and below

Your final grade is not subject to negotiation. If you feel I have made an error, submit your written argument to me within one week of receiving your final grade. Clarify the precise error I made and provide all due supporting documentation. If I have made an error, I will gladly correct it. But I will
adjust grades only if I have made an error. I cannot and will not adjust grades based on consequences, such as hurt pride, lost scholarships, lost tuition reimbursement, lost job opportunities, or dismissals. Do not ask me to do so. It is dishonest to attempt to influence faculty in an effort to obtain a grade that you did not earn, and it will not work.
