COURSE OVERVIEW

This course showcases real life applications of analytics in various domains of supply chain management, from competitive analysis and benchmarking, to selling, distribution and logistics, inventory management, sourcing and supply management, and to supply chain integration in a variety of industries. Students learn to define the right data set, ask the right questions to drive supply chain efficiency and business value, and use the right models and tools to develop data driven decisions.

COURSE MATERIALS

Textbook
A Course-pack is required for the course, which includes required cases, games and reading materials. Instructions and ordering information will be announced in Week 1 of the semester.

Software
In this course, we will use Microsoft Excel, either Excel 2003, 2007 or 2010 will be fine, and Tableau and Python, as well as others. Please install the following Excel Add-Ins before class starts: “Analysis ToolPak” and “Solver Add-in”.

TEACHING METHOD

The course will be taught using PowerPoint presentations, case studies and simulations. In each week, we will complete one lecture and all the associated readings, case studies, exercises and homework (see attached weekly schedule). Class-related material (lecture notes, videos, homework and solutions, etc.) will be posted on Canvas. Students should be enrolled in Canvas to access the posted materials. The URL is: http://canvas.rutgers.edu.

ACADEMIC INTEGRITY
I do NOT tolerate cheating. Students are responsible for understanding the RU Academic Integrity Policy [http://academicintegrity.rutgers.edu/](http://academicintegrity.rutgers.edu/)

I will strongly enforce this Policy and pursue all violations. On all examinations and assignments, students must sign the RU Honor Pledge, which states, “On my honor, I have neither received nor given any unauthorized assistance on this examination or assignment.” I will screen all written assignments through SafeAssign or Turnitin, plagiarism detection services that compare the work against a large database of past work. Don’t let cheating destroy your hard-earned opportunity to learn. See [business.rutgers.edu/ai](http://business.rutgers.edu/ai) for more details.

---

**HOMEWORK ASSIGNMENTS**

Homework assignments should be typed and handed in paper copies in class (for web-based homework, submitting a link (URL) to the project is sufficient). Be sure to put your name and contact information (email and optional telephone) on all homework submitted. Teamwork is expected for some assignments (to be specified in lectures), but team members must specify on the homework the percentage of work done by each of its members (for example, if everyone contributes equally in a 4-student team, then the percentage of work done by each student is 25%).

Assignments of a class are due by the next class, unless otherwise stated. Penalty for late submission (within one week) is 40% of the points allocated to the assignment. Submission will not be accepted if it is more than one week late.

---

**TERM PROJECT**

A term project on a supply chain analytics-related topic is a necessary part of the course. Each project should be a team effort of 4-5 people assigned by the instructor in the first two weeks. Each project team will select a topic of interest (following the guidelines listed below), make a proposal (on the story, the problem, and your solution approach) and make a thorough presentation for about 10-15 minutes towards the end of the semester (see weekly schedule for dates). Every team member must present (detailed requirements for the project are noted below). **Each team member must specify his/her percentage of contribution on the final submitted work. The project will be graded as a whole but each team member’s grade also depends on his/her contribution.**

Select one of the two formats below (an analytics-case or technology) and follow carefully the reporting instructions. If you want to do a project that does not obviously fall within the suggested categories, please contact me for permission. In any event, please select a topic that will be a benefit to the class. You may be as original and creative about the topic as you can be, but please keep your fellow classmates in mind.

I. **Supply Chain Analytics-Case**
Describe the application of analytics to a real-life supply chain problem by presenting the story, data and facts, and applying the methods/tools of this class. Please also include and be prepared to discuss implementation issues. You can draw on your own work experience (that would likely be most interesting to the class) or study a case appeared in the literature or press. Avoid the very popular press or a shallow source. Rather, look for a serious professional article, such as a financial magazine (Wall Street Journal, New York Times, BusinessWeek), economics magazine, or a trade magazine (Sloan Management Review, Supply Chain Management Review, Inbound Logistics, etc.).

II. Supply Chain Analytics-Technology
First, select novel data analytics and/or science technology, software or platform (for short, technology), and describes its contribution (or projected contribution) to the current state of art. It would be most useful if you have been exposed to the technology on your job, and can report on first hand. Examples of interest are big-data collection, processing, analyzing and visualization tools, software packages and platform, new practices of applying data analytics to supply chain operations, or anything else that is of interest to you and would likely interest class members, but within the domain of supply chain analytics. If in doubt, contact me.

Second, research the current state of the chosen technology and summarize it in your report. Find out the current or emerging commercial “players” and look at their future technological directions. Based on at least three sources (ordinary articles or Web pages, to be referenced in your report), address at least the following points using data and facts:

- What are the key technical and economical aspects of the technology which benefit the marketplace (consumers of this technology, both individual and corporation)?
- Who are the current “movers and shakers” in this area? Compare and contrast their technological and business approaches, products, etc.
- What are the current impediments to their approaches for acceptance in the marketplace? Examples are functionality, ease of use, price, technological longevity, etc.

Third, based on the current state of the technology, express your personal opinion and conclusions on the future of the chosen technology and its applications. Make sure your arguments are logical and backed by your research; you are encouraged, however, to voice opinions gleaned from your personal “crystal ball” (convictions and intuition), but be reasonable (and brief…). You may attach to your report supporting material, such as graphs and charts. Remember, anybody can collate material from the Web, but it is more difficult to analyze such material and reach conclusions. Analysis and conclusions will be the components of your term project most heavily weighted.

Note: You should not cut-and-paste verbatim material from Web pages or copy verbatim material from any other sources, unless you use that material as exact quotes. In that case be sure to enclose any pasted text material in double quotes and to provide an exact reference for it! All pasted graphs and charts should also be properly referenced. If you are unsure about referencing materials, please see the Academic Integrity information on Canvas and/or the Academic Integrity at Rutgers webpage.

III. Submission
The project is due in the last week of the course (see weekly schedule). We will have in-class presentations so that teams can learn from each other. Prior to the presentation, each team should submit three (3) documents through Canvas:

(1) A PowerPoint file for the presentation.
(2) A Word document that includes background, assumptions, models / plans, the analysis and solution / estimates, the interpretation and citations.
(3) An Excel file, Tableau files or R/Python code with all data and calculations.

A space will be created in the Assignment area of Canvas where your project documents are to be submitted.

GRADING

There will be homework assignments, simulation assignments and a term project with presentations (see term project). The weights for course work components are given below.

<table>
<thead>
<tr>
<th>Assignment</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Simulation assignment</td>
<td>10%</td>

**SUPPORT SERVICES**

[Rutgers University-New Brunswick ODS phone (848)445-6800 or email dsoffice@echo.rutgers.edu]

[Rutgers University-Newark ODS phone (973)353-5375 or email ods@newark.rutgers.edu]

If you are *pregnant*, the Office of Title IX and ADA Compliance is available to assist with any concerns or potential accommodations related to pregnancy.

[Rutgers University-New Brunswick Title IX Coordinator phone (848)932-8200 or email jackie.moran@rutgers.edu]

[Rutgers University-Newark Office of Title IX and ADA Compliance phone (973)353-1906 or email TitleIX@newark.rutgers.edu]

If you seek *religious accommodations*, the Office of the Dean of Students is available to verify absences for religious observance, as needed.

[Rutgers University-New Brunswick Dean of Students phone (848)932-2300 or email deanofstudents@echo.rutgers.edu]

[Rutgers University-Newark Dean of Students phone (973)353-5063 or email DeanofStudents@newark.rutgers.edu]

If you have experienced any form of *gender or sex-based discrimination or harassment*, including sexual assault, sexual harassment, relationship violence, or stalking, the Office for Violence Prevention and Victim Assistance provides help and support. More information can be found at [http://vpva.rutgers.edu/](http://vpva.rutgers.edu/).

[Rutgers University-New Brunswick incident report link: http://studentconduct.rutgers.edu/concern/. You may contact the Office for Violence Prevention and Victim Assistance at (848)932-1181]

[Rutgers University-Newark incident report link: https://cm.maxient.com/reportingform.php?RutgersUniv&layout_id=7. You may also contact the Office of Title IX and ADA Compliance at (973)353-1906 or email TitleIX@newark.rutgers.edu. If you wish to speak with a staff member who is confidential and does not have a reporting responsibility, you may contact the Office for Violence Prevention and Victim Assistance at (973)353-1918 or email run.vpva@rutgers.edu]
If students who have experienced a temporary condition or injury that is adversely affecting their ability to fully participate, you should submit a request via https://temporaryconditions.rutgers.edu.

If you are a military veteran or are on active military duty, you can obtain support through the Office of Veteran and Military Programs and Services. http://veterans.rutgers.edu/

If you are in need of mental health services, please use our readily available services.
[Rutgers University-Newark Counseling Center: http://counseling.newark.rutgers.edu]
